COOKIE POLICY

DOMICLEAR LTD | Last updated 10 November 2026

This policy covers the DomiClear web app at domiclear.app and the marketing website at www.domi-clear.com. It supplements our Privacy Notice. DOMICLEAR LTD is registered in England and Wales (company 17383911), registered office 17 School Lane, Chellaston, Derby, DE73 6TF.

1. Essential cookies and storage

We use necessary cookies, browser local storage and device storage to provide sign-in, sessions, account security and the requested care-management features. Disabling essential storage can prevent the app from working.

Your optional tracking preferences are stored locally under domiclear_tracking_consent_v1. The record contains the consent version, purposes selected and the time of your choice. It is not an advertising identifier.

2. Optional web-app analytics and advertising

Where configured, the DomiClear web app offers two separate optional purposes. Neither is enabled by default.

- Google Analytics 4 (Analytics): measurement of selected public signup and entry pages. DomiClear does not deliberately send patient, staff, visit or care-record page paths as GA4 page-view events.
- Google Ads (Advertising): advertising-conversion measurement on selected public pages.

The web app does not request the Google tag script until you affirmatively consent to a relevant purpose. Rejecting optional tracking does not prevent use of the care features.

Where you allow a Google purpose, Google may receive page, browser, device and approximate-location details and may set identifiers including _ga and _gcl_* depending on the purpose and Google's operation. We do not deliberately send care records or special-category health information to Google for analytics or advertising.

3. Marketing website analytics

The marketing website uses Vercel Web Analytics. Vercel describes its analytics as cookie-free and based on aggregated measurement. This is separate from the web app's optional Google tags. Hosting and security systems may still process technical request information; see the Privacy Notice.

4. How to choose and withdraw

When optional Google tags are configured on the web app, select Accept all, Reject all or Customise. Customise lets you select Analytics and Advertising independently, with both choices initially off.

The Cookie settings control remains available in the web app so you can change or withdraw consent. Withdrawal stops new tracking events initiated by DomiClear’s code, updates Google’s consent settings and attempts to remove applicable first-party Google cookies.

A third-party script loaded before withdrawal may remain in browser memory until you reload the page. Reload when convenient, after saving any work. You can also clear browser cookies; blocking essential storage may affect the app.

5. Further information

For supplier, international-transfer and data-protection information, read the Privacy Notice at www.domi-clear.com/legal/privacy. Questions: info@domi-clear.com.
